

Pillow Menu

Neck Support Pillow

- Its special high design supports the head and neck area and helps to reduce neck pain. It is suitable for double-sided use. It is an orthopedic pillow with a hard form on one side and a soft form on the other. It provides sweat absorption with 100% cotton fabric. The filling material is fiber ball. The fibers, which are turned into beads by curling, hold on to each other and give the necessary support to the head and neck region.

Cooling Pillow

- Blends comfort and health, a cooling pillow for those who are after a cool good night's slumber summer or winter.

Visco Gel Pillow

- Special 3D gel layer on Medigel creates a feeling of coolness in the head and neck area. It provides body heat balance and prevents sweating. Thanks to its memory visco structure, it supports the head and neck area and helps you sleep calmly and painlessly with less movement. It is ideal for back and side sleepers. The outer cover is washable.

Fiber Balls

- Provides the required softness with its microbead filling made of silicon fibres. Texture, comfort and softness is considered when choosing a pillow. Bean pillows never lose the shape and create a personal sleep experience which is pleasant and comfortable for the user.

No-Snore Pillow

- The hollow-centered shape of the pillow allows back sleepers to have open airways for easy breathing, reduced snoring and a good quality sleep. 100% cotton fabric reducing sweating. The filling material is bead fiber. The fibers, which are turned into bead shape, hold on to each other and spread, giving the head and neck the necessary support.

Buckwheat Pillow

- All-natural filling material to provide excellent support. Conforms to the exact contours of your head, neck and shoulders. Makes you feel well rested and wake up in a good mood.
